Revenue Opportunity by Improved Conversion

+ Potential Uplift of

£10.78K

Recommended Actions

- **Simplify checkout**
- **Improve product engagement**
- **Retarget abandoned carts**
- **Focus midweek traffic**

Final Takeaways

- **Conversion rate is significantly low (~1%)**
- Major drop-offs occur before purchase stage
- Small UX improvements can drive large revenue gains
- Strong opportunity to optimise conversion funnel

Executive Summary & Strategic Recommendations

Business Problem

- Conversion rate is **low (1%)**
- Significant drop-offs across the customer journey
- Weak performance in key segments
- Revenue heavily dependent on repeat customers

Growth Opportunities

- Optimise checkout to improve conversion
- Increase engagement before add-to-cart
- Target high-value international customers
- Improve weekend traffic and conversions

Key Insights

- Thursday and midweek drive highest revenue
- Repeat customers contribute 93% of revenue
- New customers have higher AOV
- International segment has high AOV but low volume
- Weekend (Saturday) performance is underutilised

Estimated Business Impact

- **+£10.78K** potential uplift from conversion optimisation
- Additional upside from retention & traffic improvements

Strategic Recommendations

- Simplify checkout process to reduce friction
- Implement A/B testing for continuous optimisation
- Retarget abandoned carts through marketing campaigns
- Leverage midweek peak performance for promotions
- Expand high-value international customer base
